

# TWO VERSUS TEN

**With AlumaSafway's Freestanding Material Hoist Service, elevating scaffolding on an industrial site requires just TWO people instead of ten — an 80% savings in labour.**

Based on the unique needs of the jobsite, AlumaSafway teams can choose between two freestanding hoist options. One option can lift 550 pounds of scaffolding up to 78 feet in the air, and the other can lift 880 pounds up to 118 feet. Both options lift at a speed of 150 feet per minute and are a fraction of the cost of a crane.

At Work For You<sup>®</sup>

# Improved Efficiency

“Our Freestanding Material Hoist Service improves efficiency, works well within the often-cramped environment of the refinery and keeps our crews safer. The plant management loves it because we can be more responsive than ever.”

– Site Manager

## Delivering Increased Value While Reducing Time and Cost

- › Reduces at-risk time for increased safety
- › Extremely low, back-friendly loading height
- › Easily repositioned
- › Saves cost of a crane
- › Consistent quality
- › Better reach into tight and congested areas
- › Low maintenance
- › Improves productivity
- › Easy to set up and operate
- › Gas or electric powered
- › Side panels can fold at 90° and 180° or be removed
- › Transport with half-ton truck

### Two Hoist Options

Capacity	550 lbs.	880 lbs.
Lifting Speed	150 fpm	150 fpm
Maximum Height	78 ft.	118 ft.
Operators Required	2	2
