

BrandNet[®]

Scaffold Planning, Design,
Estimating & Management

BrandNet, our proprietary digital access optimization software, streamlines access and scaffold planning, design, estimating and management throughout your project to save you time and money, while also increasing safety.

Aluma > SAFWAY[™]

At Work For You[™]

Improving access from planning and design through execution

Combining our software with WFP, one BrandNet customer saw approximately 15% fewer modifications to their scaffold builds and a 10% increase in productivity.

Visualizing Designs

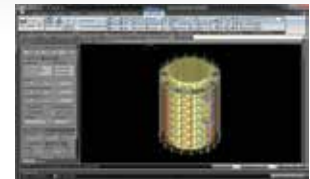

- › Create comprehensive visual digital work packages and walkthroughs
- › Standard and custom configurations for the most complex design requirements
- › Combine with 2D and 3D models, imagery and laser scanning point clouds
- › Use visuals to validate plans with workers or get buy-in from customers
- › Advanced scaffold design for safety, reusability and reduced modifications

Expert Estimation

- › More accurate project baselines
- › Custom or industry-standard approaches
- › Measure hours and costs of labour, equipment and materials
- › When paired with other digital BrandSafway products, data can be uploaded from a tablet on the jobsite directly into BrandNet.

Detailed Planning and Management

- › Create a single schedule that encompasses the access plans for each trade for the entire project
- › Time-phase plans for optimized material usage
- › Tie budgets to specific scopes of works for improved accountability

AlumaSafway provides access and industrial service solutions with turnkey installation, engineering support and safety training.
