

# IBC-Compliant Stairs & ADA-Compliant Ramps for Public Access

The *only* custom-engineered, temporary solution for construction sites and special events

These are the only temporary public stairs and access ramps designed to meet or exceed the requirements of the International Building Code and the Americans with Disabilities Act. Our custom-engineered solution also exceeds Occupational Safety and Health Administration standards for construction-grade structures — making it the *safest* public access solution available for construction sites and special events in North America.

At Work For You<sup>™</sup>

## > North America's safest temporary public access stairs and ramps solution

### > IBC-compliant Public Access Stair System

Engineered and manufactured to meet International Building Code (IBC) requirements, with a high load capacity for emergency use or high-traffic jobsites.

### > ADA-compliant Public Access Ramp

Designed and constructed to meet stringent Americans with Disabilities Act (ADA) requirements for safe public access, with a less aggressive slope, adequate turnaround space on landings, and room for emergency access and egress.

Manufactured by Universal Manufacturing using high-end galvanized steel to withstand harsh industrial and weather environments.

Customizable to meet specific jobsite requirements with AlumaSafway's engineering expertise and broad portfolio of compatible and complementary products and solutions.

Certified by an independent quality control team to validate that the custom solution achieves required specifications.

***“There isn't a solution in North America that comes close to offering the safety that these stairs and ramps provide, and we're excited to help meet this critical safety need in the construction industry.”***

— Mathieu Grumberg, Director of Product Development, BrandSafway

Portland International Airport (PDX) was the first project to utilize this revolutionary, custom-engineered public access stairs and ramps in 2019 to protect millions of passengers, while also helping to reduce costs, save time and keep the airport running smoothly during a massive renovation and expansion.

AlumaSafway is a full-service scaffold and vertical access company. You'll receive complete turnkey installation, service, engineering support, and safety and operations training.
