

Industrial Coatings

Delivering Unparalleled Expertise

Aluma > **SAFWAY**TM

At Work For You[®]

› Industrial Coatings Services

Our painters and supervisors, who have vast experience in the industry, use cutting-edge technology to provide unparalleled coatings services.

- › Maintenance outages, turnarounds and new construction
- › Pipelines and terminals
- › Off-site shop facilities
- › Asset management programs
- › Automated surface preparation
- › Industrial-quality painting
- › Thermal spray applications
- › Rhino liner applications
- › Internal coatings and liners
- › Corrosion under insulation (CUI) programs

Abrasive Blasting

- › Robotic blasting
- › Water washing
- › Water jetting and UHP
- › High-frequency induction stripping
- › Mineral abrasive blasting

Surface Preparation

- › Bicarbonate
- › Chemical cleaning
- › Hand tool cleaning
- › Hydroblasting
- › Power tool cleaning
- › Power washing
- › Scarifying
- › Solvent cleaning
- › Steel grit recycling
- › Wheelabrator Blastrac machines
- › Water injection
- › Sponge blasting
- › CO₂ ice blasting

› AlumaSafway has it covered!

With our extensive experience, award-winning environmental health and safety (EHS) record, quality control program and cost-effective options, AlumaSafway is the premier provider of industrial coatings services. We provide clients with highly skilled NCCER (The National Center for Construction Education and Research) certified craft professionals, supported by 35 NACE-trained and certified inspectors. AlumaSafway's team of well-trained personnel consists of more than 1,700 painters and supervisors who deliver safe and high quality services.

Cement/Mud Bulk Plant

Our experienced team performed sandblasting services and applied a polyurethane coatings system, which included four coats, to the entire plant with zero lost time incurred.

Chemical Facility

This project required work to be performed simultaneously on two towers, each more than 76 meters tall, during a 28-day outage. The team completed this highly time-sensitive project on time, within budget and with zero safety incidents.

Ground Fuel Storage Tanks

To prepare the interiors of several ground fuel storage tanks, surface preparation, specifically robotic blasting, was used prior to coating to safely deliver project on time and within budget.

Power Plant

Surface preparation and coatings services were completed in eight months at a power plant, delivering 30,000 accident-free labor hours and exceeding the customer's expectations for this challenging project.

Fireproofing Experience & Expertise

Our team of skilled and certified fireproofing specialists have an average of three years of experience, and many are cross-trained in services such as scaffold, insulation, coatings and refractory, allowing us to leverage their capabilities for your broader needs.

- › Epoxy systems
- › Pneumatic application (gunite)
- › Dense concrete and lightweight cementitious
- › Hand packing
- › Form and pour
- › Spray and trowel applications
- › Intumescent
- › Corrosion under fireproofing management (CUF)

In addition to on-site applications, AlumaSafway has substantial shop and yard facilities for managing off-site applications.

AlumaSafway provides access and industrial service solutions with turnkey installation, engineering support and safety training.
